

Tutorial configurare mail - Outlook2010

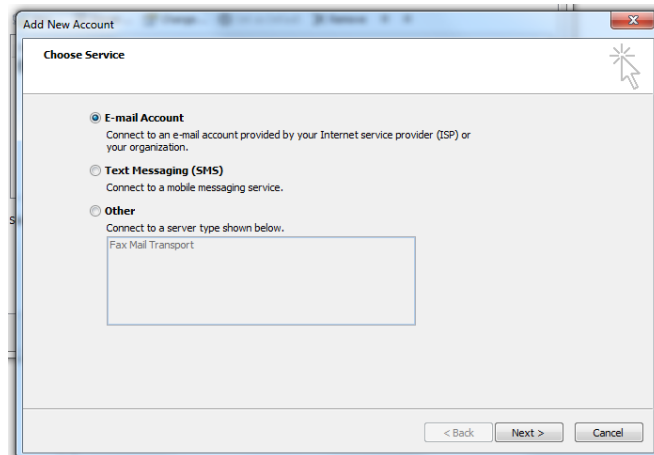

1. File -> Info -> Account Settings

2. În fereastra care se deschide se alege "New"

3. Se alege opțiunea "E-mail Account" și „Next"

4. Se alege optiunea “Manually configure.....” si “Next”

The screenshot shows the 'Add New Account' dialog box with the 'Auto Account Setup' section. The 'Manually configure server settings or additional server types' radio button is selected. The 'E-mail Account' section has fields for 'Your Name', 'E-mail Address', 'Password', and 'Retype Password'. The 'Text Messaging (SMS)' section is also visible. At the bottom, there are '< Back', 'Next >', and 'Cancel' buttons.

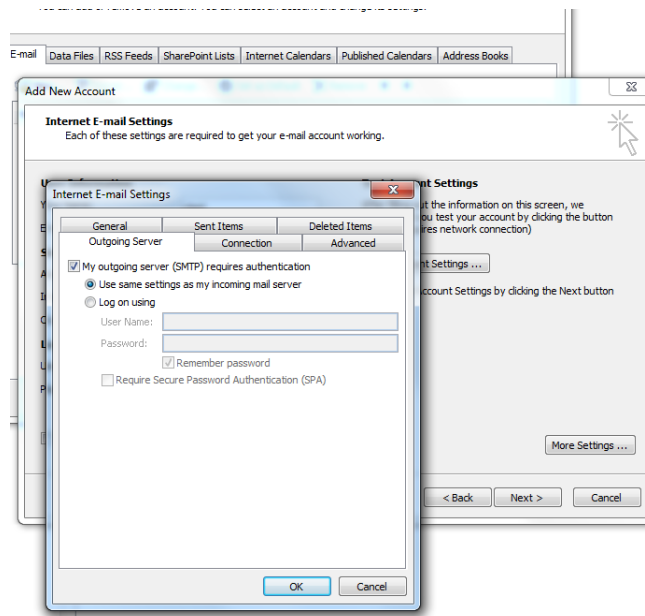

5. Se alege optiunea “Internet e-mail” si “Next”

The screenshot shows the 'Add New Account' dialog box with the 'Choose Service' section. The 'Internet E-mail' radio button is selected. The 'Microsoft Exchange or compatible service', 'Text Messaging (SMS)', and 'Other' options are also visible. At the bottom, there are '< Back', 'Next >', and 'Cancel' buttons.

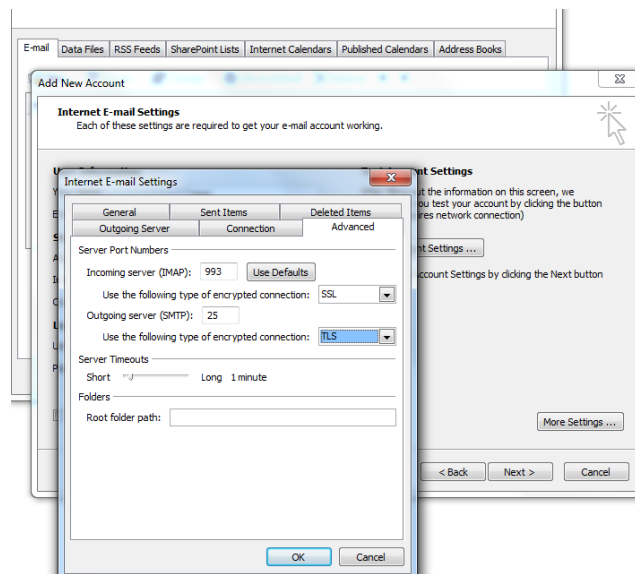

6. Se completeaza urmatoarea fereastră cu datele corespunzatoare contului de email personal, iar la Server information cu datele din figura si se apasa butonul “More Settings...”.

The screenshot shows the 'Add New Account' dialog box with the 'Internet E-mail Settings' section. The 'User Information' section has fields for 'Your Name' (ctest) and 'E-mail Address' (ctest@umftgm.ro). The 'Server Information' section has a dropdown for 'Account Type' (IMAP), and fields for 'Incoming mail server' (mail.umftgm.ro) and 'Outgoing mail server (SMTP)' (mail.umftgm.ro). The 'Logon Information' section has fields for 'User Name' (ctest@umftgm.ro) and 'Password' (masked with asterisks), with a checked 'Remember password' checkbox. The 'Test Account Settings' section has a 'Test Account Settings ...' button and a checked checkbox 'Test Account Settings by clicking the Next button'. At the bottom, there are '< Back', 'Next >', and 'Cancel' buttons, and a 'More Settings ...' button.

7. In fereastra deschisa la Tab-ul "Outgoing Server" se bifeaza optiunea "My outgoing server..."

8. La Tab-ul "Advanced" se aleg setarile ca in figura si se apasa butonul "OK" :

9. Se accepta importarea certificatului:
